MISS GRACE PATTERSON.

REPORT

PRESENTED TO THE CONTRIBUTORS AT THEIR ANNUAL MEETING
JANUARY 8, 1875.

THE Annual Report of the Hospital for the past year, like its predecessors, evidences a continued and gratifying progress.

188 cases have been treated in the wards, a slight decrease from the number of 1873, attributable to the presence of hooping-cough and measles, during the first quarter of the year: and 4420 patients attended at the Dispensary, an increase of 1162 over the previous year.

By referring to the tabulated statement of the Resident Physician, annexed to the list of diseases treated, it will be seen that more recent accidents have been treated, and a larger number of operations performed than in any previous year, and in nearly all these cases the result has been favorable.

The Treasurer's Report for 1874 shows that the receipts from all sources for the Current Fund were \$9288.97, and for the Permanent Fund \$7054.78. The expenditure for the year has been \$9734.00. Notwithstanding the practice of the utmost economy, at the closing of the account for 1874 a balance of only \$332.14 remained in the hands of the Treasurer, with unpaid bills of more than twice that amount outstanding. At the present time this condition of financial embarrassment is peculiarly unfortunate, as in addition to the difficulty of obtaining funds for the ordinary expenses, the absolute necessity which exists of a more ample ward accommodation urgently calls for action at no very distant date.

As at present arranged, the actual allowance of air to each bed in the Hospital is less than 750 feet. It should be at least 1000 cubic feet per patient, particularly in a hospital where no special provision exists for the separation or iso-

lation of bad cases of disease and accident. To this deficiency in our arrangements we desire to direct especial attention, as experience has shown that not only will many offensive cases, both surgical and medical, be treated in the wards, but that occasionally infectious disease makes its appearance in the Hospital; and for the proper isolation of these there is actually no provision. It is true that cases of a contagious or infectious nature are never *knowingly* admitted, but it is easy to understand how such may originate in the Institution, or may find their way into the wards during the latent period without detection, and afterwards become the means of spreading infection among the inmates.

These and other reasons connected with the hitherto imperfect classification of patients of both sexes, have convinced the Managers that additional ward accommodation should be provided as soon as possible for the following classes of cases:—

1. For severe surgical cases, such as extensive burns, compound fractures, large suppurating surfaces, and inveterate cutaneous diseases, which no amount of disinfection or cleanliness can prevent from becoming very offensive if not actually poisonous, when introduced into a general ward, no matter how airy and well ordered.

2. For such contagious and infectious diseases as may and do occasionally originate in the wards, as erysipelas, scarlatina, measles, and hooping-cough.*

3. For the isolation and special treatment of certain affections of the eye and ear, for many of the former, of which the *exclusion of light* is an indispensable element of cure. For obvious reasons it would also be desirable to have special accommodation for patients during convalescence, the progress towards cure in many such cases being undoubtedly retarded by retaining them in the more or less contaminated atmosphere of a general ward.

* From the visitation of the last-named two affections for three years past the working of the Hospital has been seriously interfered with and its system disorganized.

To properly carry out these objects a large outlay will be required, probably from \$8000 to \$10,000. Available for the purpose there is in the hands of the Treasurer about \$6000, of which amount \$1000 has been generously contributed by a gentleman of this city for this special object.

It is the intention of the Managers, if possible, to begin this improvement during the current year, and they earnestly hope that this much-needed addition to the Hospital may commend itself to the liberality of its friends.

The successful establishment of the Children's Sea-Shore House at Atlantic City, and the opening during last summer of a Hospital, for a similar purpose, at Radnor, a healthy location not far from the city—both under excellent auspices—for the present at least have furnished the necessary accommodation for our patients during the summer months. The Managers have therefore for a time abandoned the project of a separate Convalescent Branch—and the funds already contributed for that object have been invested, and the income is used for the summer board of the patients.

As no summary of the Hospital statistics has been furnished for several years, it may be well here to give a brief *résumé*.

Since its opening in November, 1855, the Children's Hospital has relieved 2069 *in-door*, and 39,508 *out-door* or Dispensary patients. All but a trifling fraction of this number have been treated on the *free* list, and medicines have been furnished gratuitously. The cost for the maintenance of the Hospital has been \$79,052.65, and during eighteen years the cost of each patient has not materially varied from an average of 50 cents per day.

Owing to the unwillingness of parents to entrust their children to Hospital care and nursing during the *acute* stages of sickness, from an early period the efforts of the Managers and Physicians have been mainly directed towards providing for *chronic* cases. Gradually the treatment of diseases of the larger joints, and of the spine—either by mechanical appliances or in many cases by operation—has

become, as it were, a specialty of this Hospital, and it is with much satisfaction that the Managers refer to the statistics of some years past, as evidence of the almost unprecedented success which has attended the efforts of its Surgeons in this difficult, and until recently, much-misunderstood department of surgery.

During the year no important additions have been made to the building, but various minor improvements have been carried out. The increase of the Dispensary has made it necessary to establish an additional morning clinic, and the Staff of Dispensary Physicians has been enlarged by the appointment of Drs. W. F. Jenks, G. A. Gerhard, Arthur V. Meigs, and Comegys Paul.

The Managers have to thank the many kind friends of the Hospital for numerous donations. By Mr. Charles C. Harrison \$1000 has been contributed for the purpose before alluded to (the establishment of separate ward accommodation for special cases), and they desire to acknowledge the receipt of the following bequests, viz., \$1000 from the estate of Esther L. Cooper; \$950 from the estate of Mrs. Isaac Lea, \$1000 from the estate of Jesse George, and \$1000 from the estate of George Grove, and from Mr. and Mrs. Edward S. Willing \$2000 for the perpetual endowment of a free (memorial) bed.

To the Lady Visitors are especially due the thanks of the Board, as well for the careful and judicious supervision of the household affairs, as for their unwearying kindness to the patients, and their devotion to the interests of the Hospital, which is and always has been, so largely indebted to their liberality.

To the Attending Physicians, to the Resident Physician, Dr. C. C. Mann, to his predecessors during the year Drs. E. L. Parks and C. Matteson, and to the Matron Miss Neely, the Board desire to convey their thanks for the zealous and faithful discharge of their respective duties.

On behalf of the Board,

GEO. A. WOOD,

President.

EXTRACTS

FROM THE

ANNUAL REPORT OF THE ATTENDING PHYSICIANS FOR 1874.

THE following statistics of the business of the Hospital are extracted from the Annual Report of the Attending Physicians, for 1874, presented to the Board of Managers, January 1, 1875:—

Table showing the number and sex of those admitted and discharged for the year ending December 31, 1874.

	Boys.	Girls.	Total.
Remaining Dec. 31, 1873	23	17	40
Admitted during year	82	66	148
Number treated during year	105	83	188
Discharged	79	54	133
Died	5	3	8
Remaining Dec. 31, 1874	21	26	47
	105	83	188

Table showing the nativity of those admitted during the year.

“ Principal Operations Performed on House Patients during 1874.”

Abscess of hip emptied by as- piration.	{ Successful.	“Excision of Submaxillary glands.”	{ Cure.
“Amputation of thigh.”	Cure.	Lithotomy.	Cure.
“Circumcision for phimosis”	Cure.	“	Cure.
“Division of hamstring ten- dons.”	{ Cure.	Onychia.	Cure.
“Excision of head of femur.”	{ Under treat- ment.	Removal of diseased bone for femur.	{ Under treat- ment.
“ “ “	{ Died.	Removal of diseased bone for forearm.	{ Under treat- ment.
“ knee-joint”	{ Under treat- ment.	Strangulation of nævus.	Died.

Among the more important cases attended at the Dispensary Clinic (surgical) may be enumerated—

Amputation of supernumerary toe	1	Fracture of scapula	1
Aneurism by anastomosis and nævus	5	“ ulna	1
Bursal tumor	1	Hydrocele	5
Cyst of temporal region	1	Nasal polypus	2
Cyst of tongue	1	Necrosis of jaw	2
Dislocation of elbow	2	Noma	1
Division of tendo-Achilles	1	Onychia maligna	2
Foreign bodies removed	5	Paraphimosis	1
Fracture of elbow	3	Paronychia	1
“ forearm	6	Phimosis	2
“ radius	3	Tongue tie	2

At the *Eye and Ear Department* the following operations were performed for—

Abscess of lids	2	Polypi (aural)	23
“ meatus	3	Removal of foreign bodies from eye	2
Abcession of globe	1	“ “ ear	2
Cataract	1	Strabismus	2
Conjunctival tumors	2	Wound of auricle	1
Paracentesis of cornea	1		

(NOTE.—This list is incomplete, owing to imperfections in the Clinical Records. The result in nearly all these cases has been favorable.)
